PROFESSIONAL EXPERIENCE

Soonr   Remote

Junior Web Developer (Internship)   05/2023 – Present

Technologies: React, React Native, Redux, CSS, HTM
- Part of 4 person team, including 2 QA, delivering product serving 18,000 users
- Released features and bug fixes as part of 1 week sprints, with personal velocity of 2 items / sprint.
- Independently responsible for building 2 new features, and maintaining 2 other features

Pela   Kelowna, BC

Junior Service Desk Analyst   08/2021 – 02/2022

Technologies: Javascript, Handlebars, Postman, Netsuite
- Reduced internal shipping errors by 80% by researching and applying fixes within Netsuite and Celigo
- Increased productivity by 15% between CX and Operations by optimizing order flows
- Substantially reduced future employee onboarding time requirements by creating internal help desk articles for very specific processes related to sales, shipping and technical support
- Left to seek a position more closely related to my fields of study after finding no further growth opportunities

BrainStation   Vancouver, BC

Teaching Assistant (three month contract)   04/2021 – 07/2021

Technologies: React, Javascript, HTML, CSS, VS Code, Postman
- Played a vital role in increasing the impact and efficacy of course material by providing questions, code samples and concepts to lead students to the answer without simply providing the answer
- Allowed instructors to focus on preparing lessons and assignments by taking care of project grading, morning challenge delivery, code review and attendance tracking

PROJECTS

Seq - musical sequencer ▪ https://seq-gules.vercel.app/   04/2023 – 05/2023

Technologies: React, Tailwind, Tone.js
- An ode to music software from my teenage years, allowing users to construct electronic loops with two synthesizers and a drum machine

Twitter Clone ▪ https://tweeter-seven.vercel.app/   02/2023 – 03/2023

Technologies: Next.js, Tailwind, Firebase
- A focus on the design and core functionality of Twitter. Auth via NextAuth and data storage with Firebase

StreetPost ▪ https://streetpost-firebase.vercel.app/   05/2021 – 11/2021

Technologies: React, Sass, Firebase, Google Maps API
- My capstone project at BrainStation was this - a location based notes app allowing users to pin memories, notes and photos to real life locations and access others' posts by physically visiting that location

EDUCATION & ACCREDITATIONS

BrainStation web development diploma program   01/2021 – 04/2021
